IMPORTANT NOTICE:

- The picking of the sheet from the ream must happen in the presence of specific separators and of multiple ionised airflows which allow the sheet to be detached and then fed into the subsequent printing stations with ease. The resulting ionised air cushion generates an anti-static field able to neutralise static charges on synthetic sheets, simplifying both the printing and the stacking phase.
- The total thickness shown in the chart includes the layer, the glue and the liner (if present).
- All the above products are also available in sample box and bulk pallet.

Welcome to Mr Magnus

The printing sheets and special "ready to use" products division of Guandong Italia, a 100% Italian company of the Elvi Holding Group.

Quality, Future Vision, Sustainability, Collaboration:
today it is possible to choose to embrace all these values that feed our passion every day that we want to share with you.

Get inspired.

In Mr Magnus you will find products, which we call Solutions. We have implemented certifications and sustainability because we consider them as Innovation and Progress. You will discover ideas, in which we see the Potential. There is also the possibility to customize our products tailored to your needs, we have christened it G5 Factory.

The future is an attitude: some see only what there is, we see what will be there.
